

Western Trap Equipment

V1579C Western Modified Clay Pigeon Trap

This trap incorporates all the features of the V1524C, plus the ability to throw vertical angles for simulated International style shooting. Trap is interrupted to comply with ATA rules.

A simple adjustment permits the vertical movement assembly to be easily disconnected and connected again in the field, offering the capability of throwing targets for either regulation trap or simulated International trapshooting.

Existing V1524C traps can be factory modified to V1579C specifications. Inquiries should be directed to the Trap Sales Department

A special lightweight throwing arm is available on special order for throwing the heavier International Clay pigeons 75 meters, plus or minus 5 meters, as required for Olympic type shooting.

NOTE: This special lightweight, long-range throwing arm *cannot* be adjusted down to the 50-yard distance specified for regulation trapshooting. Operates on 115 volt, 60 cycle AC power source.

V1581C Western Modified International Trap

For operation only on a 220 volt, 50 cycle power source. Trap is interrupted to comply with ATA rules.

This is the same basic trap as the V1579C described above, but factory equipped with a special lightweight throwing arm. As required by International Shooting Union (ISU) regulations, this trap can throw the heavier International clay pigeons 75 meters, plus or minus 5 meters.

V1574B Self-Loading Electric Traps for Domestic & International Skeet

Most modern skeet traps available, the Western Self-Loading Electric Skeet Traps provide the utmost in operational economy. These are THE traps for competition skeet shooting. They are the only traps which have been used at the annual National Skeet Shoot since 1958. Simple adjustment of spring tension will provide either domestic or International throwing distances. Will accommodate standard diameter or oversize targets with magazine rail adjustment.

One man, reloading between rounds, operates an entire field by himself. Each trap holds a reserve of 75 targets, more than enough for a full squad.

Streamlined. The ruggedness of aluminum and steel. Oilless bearings. Automatically clears itself of accidentally broken targets in magazine or carrier.

Precision release from target to target assures more uniform performance. The Western Portable Electric Skeet Release is both waterproof and shockproof as long as the rubber covering retains its integrity. Always check before using. The operator may follow the squad around the field in any kind of weather assuring that there are no missed calls. Master switch can be controlled by trap attendant for maximum safety.

V1577B

V1524C

V1582A Autoloading Regulation Trap

Latest version of the most popular autoloading regulation trap ever made. Redesign provides improvements including positive feeding and virtual elimination of target breakage. Simplified servicing uses standard electrical hardware and the new improved X400 trap release. Trap operates from 115 volt, 60 cycle. A.C. power source.

A new remote control unit permits operation from outside the trap house, out of view of the trap machine. The addition of a "Fire" button to the control unit and new rotating, latching windage adjusters simplify target flight adjustments. Quick change over from singles to doubles. (Doubles Manually loaded). Trap includes interrupter to conform with ATA rules.

V1583A Autoloading International Trap (illustrated)

The "Universal" trap combines all the features of the V1582A plus vertical motion and increased throwing distance. Single and dual springs are provided. Trap will throw 75 meter targets for UIT, (ISU) events, plus regulation ATA targets. Four ranges of vertical motion are provided, all interrupted to prevent trap reading. The 190 target magazine easily accommodates the requirements of six man international squads.

V1577B Self-Loading Electric Regulation Trap

Maximum convenience and optimum performance are yours with the Western Self-Loading Electric Regulation Trap. One man operation gives you the ultimate in operating economy and eliminates the inconvenience of waiting for trap boys. Once loaded, just a push of a button is all that is needed to throw the target, cock the trap and reload the throwing arm.

Immediate release and fast recovery enable this trap to keep up with the fastest squads. Target placement on the arm is mechanically precise assuring more uniform throws and less target breakage. Quick change-over from singles to doubles or vice versa.

Easy, economical installation. No push-pull rods needed. Power and release cables plug into trap base and operate from 115 volt, 60 cycle A.C. power source. Trap incorporates an interrupter to comply with ATA rules.

Rugged - no brake or belt tensions to adjust. Trap swivels on large adjustable ball bearing mechanism for long, reliable service. As trouble-free as a trap can be.

Safe - separate control unit, mounted outside trap house, provides maximum safety.

V1524C Western White Flyer

This is the trap that sets the standards in competition shooting. These dependable traps have been the only ones used at the Grand American since 1955. In recent years, at this event, 53 of these traps have been throwing over 2,000,000 targets during the nine-day shoot! Instantaneous, push-button, random release.

Easy, economical installation. No push-pull rods. Operates on 115 volt, 60 cycle AC power source.

Simple hand adjustments for wind and elevation.

Convenient master switch, **Western** Trap is interrupted to comply with ATA rules.

Existing V1524C traps can be converted to traps in our factory. This conversion enables the operator to random release the targets in a vertical and horizontal plane as required for Olympic style shooting.
